

IT services: Your own Wi-Fi network for registration

inspiring
people

Your registration always online, guaranteed

Your registration system depends on reliable internet access. Cabled internet connections are the best option as they are only used by you. If you prefer wireless access, this will generally be shared with your visitors, which carries the risk of disrupting the registration process.

To avoid sharing your registration Wi-Fi with others we can supply your very own Wi-Fi network. This will ensure that you don't have to make any connections or share capacity. You are also guaranteed to be online at all times.

Your benefits

- > Higher quality Wi-Fi via your own network
- > Always online, guaranteed
- > RAI Amsterdam facilitates and supports your Wi-Fi network; you won't have to connect a thing

Good to know

- > Your own Wi-Fi network at your stand includes internet access
- > The Wi-Fi network is available at the agreed time

- > The usable bandwidth per connected device is between 5 and 10Mbps
- > The Wi-Fi is transmitted at 5GHz; please check in advance this is supported by your devices
- > Your PC cannot be connected to the network cable linked to the Wi-Fi transmitter
- > The Wi-Fi network is developed specifically for you and cannot be shared
- > The network name and password are predetermined and cannot be adjusted
- > We can provide multiple registration areas with separate Wi-Fi networks

We offer

- > Custom Wi-Fi at your stand, aligned to the required capacity as agreed
- > Experienced IT specialists
- > Professional advice and support
