Improve the quality of your sessions

Involve participants in presentations with our Audience Interactive Response (AIR) system. Designed to boost the interaction capabilities of your PowerPoint presentation. This solution enables participants to ask or answer questions during the presentation, bringing the dialogue between speaker and audience to a new level.

We offer

- > An intake discussion with one of our experts
- > Installation of the system, including:
 - User instructions
 - Onsite assistance
 - Wi-Fi extension, if necessary
- > A report on input from the participants

AIR can be used without any special equipment. Users can easily take part via Twitter and SMS.

Benefits

- > Attractive platform for your speakers
- > Increased involvement and enhanced focus by participants
- > Improved knowledge transfer
- > Benefits for your future sessions thanks to the use of reports as input

Making life easy

We provide a complete package of full-service IT products and customised services. Like to know more about our other IT services? Click here www.raai.nl/itservices or ask your account manager for more information: **+31 20 549 12 62**.
