

IT services High Density Area

inspiring
people

A high-density network requires careful analysis & planning

The capacity of your Wi-Fi network is aligned with the expected number of visitors present throughout the venue. Theatre setups in a hall, voting during sessions or areas that expect larger numbers of visitors often require extra Wi-Fi capacity.

The **High Density Area** is a part of the space in which we can make the Wi-Fi more powerful, allowing people to seamlessly use the Wi-Fi network.

Your benefits

- > The High Density Area relieves pressure on the entire Wi-Fi network
- > The High Density Area provides extra Wi-Fi capacity where needed
- > With a High Density Area, the Wi-Fi network is ready for interactive sessions with a greater number of simultaneous connections

Good to know

- > The High Density Area is only available as part of the event Wi-Fi
- > The High Density Area cannot be moved during the event

- > Multiple High Density Areas are available
- > The Wi-Fi access points are placed on a tripod which is equipped with skirting
- > The High Density Area and event Wi-Fi have the same login details, visitors will not notice they are using the High Density Area
- > The High Density Area is available from 08.00 AM on the final build-up day

We offer

- > Custom Wi-Fi attuned to the required capacity
- > Experienced IT specialists
- > Professional advice and support
